Statistics 2000

Production of blast furnace slag: 25 million tonnes

- granulated blast furnace slag: 69%
- air-cooled blast furnace slag: 22%
- pelletized blast furnace slag: 2%

Use of blast furnace slag: 29.4 million tonnes

- cement production / concrete addition: 55.9%
- road construction: 39.5%
- hydraulic engineering: 0.1%
- fertilizer: 0.2%
- others: 1.7%
- interim storage: 2.7%

Production of steel slag: 16.8 million tonnes

Use of steel slag: 16.8 million tonnes

- road construction: 39%
- hydraulic engineering: 4%
- fertilizer: 4%
- internal use for metallurgical purposes: 14%
- cement production: 8%
- interim storage: 7%
- final disposal: 24%
