Statistics 2002

Production of blast furnace slag: 17.8 million tonnes

- Granulated blast furnace slag: 67%
- Air-cooled blast furnace slag: 29%
- Pelletized blast furnace slag: 2%

Use of blast furnace slag: 25.4 million tonnes

- Cement production / concrete addition: 55.9%
- Road construction: 39.5%
- Hydraulic engineering: 0.1%
- Others: 1.7%
- Fertilizer: 0.2%

Production of steel slag: 17.2 million tonnes

- BOS - slag: 51%
- EAF - slag: 35%
- Secondary metallurgical slag: 14%

Use of steel slag: 17.0 million tonnes

- Road construction: 40%
- Hydraulic engineering: 2%
- Internal use for metallurgical purposes: 14%
- Interim storage: 7%
- Final disposal: 24%
- Cement production: 8%
- Fertilizer: 4%
